1 Specific preferred insulin products will be available for a \$25 copay per \$30-day supply and a \$75 copay per 90-day supply through the Express Scripts Patient Assurance Program. The insulin products included in this program are Humulin, Humalog and Lantus.

2 The Prescription Drug Plan annual out-of-pocket maximum is based on plan enrollment and is separate from the medical plan annual out-of-pocket maximum.

- 3 The deductible applies to brand name medications only.
- 4 Retail90, also known as Smart90, is Express Scripts' program which allows individuals to fill their prescriptions for up to a 90-day supply via select retail pharmacies.
- 5 The Value-Based Drug Plan eligibility is based on actively participating in the Care Coordination Program for management of specific chronic conditions (asthma, chronic obstructive pulmonary disease (COPD), diabetes, and heart disease). Visit yp4h.osu.edu to learn more about the Care Coordination Program.
- 6 Non-Formulary Brand Name Drugs are not eligible for the Value-Based Drug Plan.
- 7 The Value-Based Drug Plan is not available at Non-Preferred Pharmacies.
- 8 Certain specialty medications are included in the SaveonSP copay assistance program and subject to a different copay structure. While there are copays associated with each product included in the SaveonSP program, the member copay will be \$0. If an individual chooses not to enroll in SaveonSP, they will be responsible for the prescription drug copay for qualified medications, and the copay amount will not apply to the Prescription Drug Program out-of-pocket maximum.
- 9 In certain cases, the outpatient pharmacy at Nationwide Children's Hospital may also fill prescriptions under the Specialty Medication Plan. Contact OSU Health Plan for details.
- 10 The infertility treatment medical benefit includes the cost of prescription medications and requires prior authorization from OSU Health Plan.
- 11 The Prescription Drug Program annual out-of-pocket maximum does not apply to infertility medications.
- 12 Infertility treatment has a separate lifetime maximum benefit.
- 13 The infertility drug coinsurance does not have a maximum cost per prescription for formulary and non-formulary brand name medications.

Note: The Prescription Drug Plan, Value-Based Drug Plan and Specialty Medication Plan designs have a combined deductible and annual out-of-pocket maximum.

Certain prescription drugs require prior authorization; refer to hr.osu.edu/oe for additional information. This document is intended to be a short summary of program provisions. Plan limitations and exclusions are not included.

For greater details about the Prescription Drug Plan, refer to the Medical Plans – Specific Plan Details document, available online at hr.osu.edu/oe. If the information in this summary differs from the Specific Plan Details document, the Specific Plan Details document will govern.
