OSHA recommends workplace safety training for a safe and healthful work environment. This training covers specific OSHA regulations and requirements specific to those working in construction, health care, factory, warehouse, manufacturing, storage and more.

OSHA 30 Training for General Industry takes place at your site or one of the COTC campus locations in Newark, Pataskala, Coshocton, and Mt. Vernon.

Choose 5 dates to fit your schedule!

Sample Schedule:
8-11 a.m. and 11:30 a.m.- 3 p.m. over 5 dates of your choice; 5 consecutive dates are recommended.

Corporate Rates: $195 per participant or $175 per participant if sending a group of 5 or more.

OSHA 30 training is an effective method used to train workers and supervisors on hazard recognition and OSHA safety standards. Our training covers specific OSHA regulations and requirements as they apply to the general industry, and teaches safety awareness to help each worker recognize and reduce the risks of jobsite hazards. This interactive hazard recognition training is intended as a comprehensive look at OSHA standards for employers and employees.

Course Objectives
• Understand the OSH Act, the functions and resources of OSHA
• Become aware of the OSHA inspection priorities and describe the inspection process
• Know the rights and responsibilities of employers and employees under the OSH Act
