

Central Ohio Technical College
Fire Science Technology Course Completion and Withdraw Rates
AY2016 - AY2021

Between academic years 2016 and 2021, the fire science technology aggregate course completion rate was 98.5%, peaking in AY20 at 100% and remaining at 100% for AY21. The course withdraw rate was 1.5% over this period and fell to 0% in AY20. Course completions can also be thought of as "retained" enrollments and high course completions equate to high retention.

Course completions include all grades A through F, indicating students at least completed the course, even if not earning the academic credit. Formal course withdraws are recorded on-or-after the course census. Data are as of spring semester 2021 and include all course enrollees including students not declared in the fire science program.
