Respondent Comments:

The course that was given in FST helped me fine tune my skills for promotion and to help work with other employees and with the Fire Chief.

Some of the general education classes were not conducive to a working adult returning to the classroom. A course only offered during the week in the middle of the day doesn't offer many option for a person who has to work in order to make ends meet, but are trying to better themselves by obtaining an education. Chemistry is, a perfect example. I was required to take burn up my vacation and or make other arrangements in order to complete this twice a week class. There needs to be evening or weekend options for this class not just 1 to 4 on Tuesdays and Thursdays.
